

Benefits of

Composting *and* Worm Farming

Composting and worm farming are effective, sustainable practices that transform everyday food and garden scraps into nutrient-rich fertiliser for your garden.

By composting or using a worm farm, you contribute to:

**Reduce
landfill waste**

**Lower CO²
emissions**

**Cut emissions
from greenhouse
gasses**

**Enriching
your soil**

**Support soil
health and water
retention**

**Promoting
biodiversity**

How a *Worm Farm* Works?

**Cover +
Worm Blanket**

**Worm Casting
(compost)**

Air Vents

**Active Area
with worms + scraps**

Drainage Holes

**Worm Tea
Collection**
