

# ACACIA PARK, PRESTONS LOCAL PARK CONSTRUCTION - Final Concept Plan

## DRAFT CONCEPT PLAN

Overall layout design for Acacia Park.

Proposed layout of the play space area.

The proposed landscape design for Acacia Park in Prestons creates a new play space with a picnic setting under shade for the local community to rest and play, while providing a new pathway to formalise a direct connection between Acacia Avenue and Grevillea Crescent.

The children's play space consists of a dual swing set and a multiplay unit that includes slippery dip, overhead climbing rings, xylophone and climbing net. A shade sail structure will be installed over the play area to protect children from direct harsh sunlight exposure. The additional tree planting and garden beds improves the visual amenity of the park.

## PROPOSED TREES AND SHRUBS

*Melaleuca linarifolia*  
Snow-in-summer Paperbark

*Acacia decurrens*  
Sydney Green Wattle

*Callistemon viminalis*  
Weeping Bottlebrush

*Grevillea 'Robyn Gordon'*  
*Grevillea 'Robyn Gordon'*

*Westrigia fruticosa*  
Coastal Rosemary

*Gazania tomentosa*  
African Gazania

*Phormium tenax*  
New Zealand Flex

Proposed multiplay unit with slippery dip, overhead climbing rings, xylophone and climbing net

Dual swing for toddler and young children
