

Information required to be provided with any application for excavation/dams is as follows:

**(1) Site Plan showing:**

- Location of the dam on the site
- Existing contours of the site drawn to AHD by a registered surveyor
- Finished levels of site drawn to AHD after proposed work
- Any trees affected by the proposal or any land identified as potentially significant flora/fauna
- Any easements/positive covenants, watercourses and the like.

**(2) Plans / Drawings showing:**

- Size, depth and height above ground level, spillway location
- Landscaping to be carried out
- Overflow disposal

**(3) Statement of Environmental Effects must include the following:**

- Effect on drainage patterns
- Impact on adjoining allotments
- Erosion and sedimentation management
- Measures for control of dust
- Proposed disposal of excavation material
- Materials (if any) to be imported into the site (volumes/origin/type)

**It should be noted that a Construction Certificate will also be required to be submitted in relation to the construction / filling of a dam.**
